Jabirus, Jaguars, and Wolves! Oh, my!! – April 8

April Program: Lynn Moseley, Guilford College Professor of Biology*, and Lou Skrabec, amateur photographer extraordinaire, will take us on an armchair ride through Brazil's Pantanal, the world's largest wetland. Ecological diversity and living wonders abound. Check our [monthly calendar](#) for complete details.

*also extraordinaire

Let's Talk Trash – April 10

What a winter this has been! Nature delivered snow, wind, and lots of rain, all of which move trash from our streets into our streams. So it's time for another Great American Cleanup, and Pearson Audubon will do its part at the Natural Area. Please join us. Complete activity and RSVP information available on our [website](#).

Earth Day and KidzBlitz! – April 10

Audubon will have two tables at this year's Earth Day celebration, April 10, from 1–5 p.m. at Price Park. The first table will feature our interactive nature games, with loads of information about birds, nature, and Audubon. Next door is the KidzBlitz!, our kids-only warmup for the big BioBlitz! coming on May 15th, and featuring naturalist walks to identify as many living things as we can. Please join us, and if you'd like to volunteer, contact Sue Cole, 854-3346, suelyle@bellsouth.net.

A Walk on the Wild Side – April 17

The Guilford County Open Space Program has preserved over 1000 acres of natural areas. One of the most beautiful is the Baynes/Berkelhammer Tract, 120 acres of mature woodlands, steep slopes, and cascading streams that give us a mountain feeling right here in Guilford County. On Saturday, April 17, we will be led on a walk into the heart of this special place. Find out more and RSVP by clicking [here](#).

Randolph County Warblers and Wildlife – April 24

Join the Piedmont Bird Club at the Lewis' Randolph County property for a full or part-day of great birding, good company, and a tasty potluck lunch. When you're not busy searching for the eleven species of breeding warblers, relax on the porch by the pond, listening to the frogs, joined later in the day by calls of the Whip-poor-wills. Please check our [website](#) for complete details and to RSVP.

Audubon North Carolina Annual Meeting – May 21-23 Registration Due April 20

This year's annual meeting (open to all!) will be in the spectacular Highlands Plateau. Look for mountain specialties on Whiteside Mountain and the Bartram Trail, hear the latest from Audubon, and relax with friends – all at a rustic getaway with views of Blue Valley and the surrounding mountains. Registration is due by April 20th, so check out the [information](#) on schedules, lodging, field trips, and programs and [sign up](#) now.

The Sounds and Sights of Spring

The sounds and sights of spring are here – leopard frogs and Whip-poor-wills calling, mourning cloaks and commas beating their wings in the warm sun, Purple Martins streaming northward across the state. Here's a marvelous website where you can follow the progress of the [martins' spring migration](#).
